AQC Animal Health · Design system v1.0

AQC Clinical

A calm, clinical system for quarantine officers and contractors working one-handed on the kennel floor — and for supervisors and auditors at a desk.

Glanceable
Status first. Every list row answers "is this animal okay?"

Default-normal
Forms start at Normal; officers only touch what differs.

AI, attributed
AI content is always iris-tinted and cites its sources.

01 · COLOR

Palette & semantic tokens

Clinical teal signals biosecurity and care; deep navy carries selection; iris is reserved for AI-generated content. All text pairs meet WCAG 2.2 AA (4.5:1).
